

Simulated Emergency Test (S.E.T.)

Hosted by the McHenry County EMA

September 17th 2016 11AM – 1PM

**Located in the Woodstock Square and other various
locations throughout McHenry County**

McHenry County EMA Radio Amateur Civil Emergency Services (RACES) volunteer division will be participating in the annual SET exercise, and we need YOUR help!

This is a communications disaster exercise which will simulate a county-wide failure of phone and internet communications. Amateur Radio Operators will be located at various locations throughout McHenry County and will be looking for the public to communicate fake emergency messages to them. Participants will chose from already prepared messages at each site.

Those who participate in the exercise will be given an “I Prepared” sticker and if participants take a photo with that sticker on, and post it with the hashtag #McHenryCoSET they will automatically be entered into a drawing to win a prize.
