DOWNTOWN WOODSTOCK SMOKING SURVEY

On January 1, 2008 the Smoke-free Illinois Act became effective. One of the purposes of this Act was to limit the presence of second-hand smoke and to create healthier public spaces. The Act requires that virtually all public places and workplaces be completely smoke-free inside and within 15 feet from entrances, exits, windows that open, and ventilation intakes.

The purpose of this survey is to help the City determine if there is support for additional smoking controls in the downtown area. Your opinion is important and will assist the City Council in its efforts by providing public input as to whether this is an important concern and a high priority for both residents and the business community. Your participation in this survey is appreciated. Please respond to the following questions by circling the appropriate answer and return the completed survey to City Hall, 121 West Calhoun Street, Woodstock, IL 60098.
